

The Importance of Clubs at Harrison Bay FRC. Research done by Caleb Lancaster

As I went around the clubs Friday asking questions to students, almost every person gave me the same response, "It lets me connect with other people that have similar common interests."

Some students also responded with different answers such as Riley Martin, "You get to experience things you wouldn't do in regular classes."

Taking this response to one of the teachers, I asked Mr. Bright, head of Robotics and SkillsUSA his thought about clubs and if they connect students better.

He stated, "We are side by side going to a tournament and there is no better feeling than the combination of competition and camaraderie as a team."

I also asked students about skills and benefits you can develop or gain by doing clubs and I received a lot of different answers to this question.

- Leadership
- Life Skills
- Communication Skills
- Creating memories
- Family

Family really caught my attention so I talked to Giancarlo Lazarte about this answer in particular and he said, "Yeah, we all have our own community." I think this speaks volumes about clubs.

Clubs at Harrison Bay Future Ready Center:

E sports

Leadership/Service

Manufacturing

Self-Directed Studies

SkillsUSA/Robotics

Solar and Renewable Energy
