

Harrison Bay FRC Manufacturing Club Products found in ACE Hardware

The Manufacturing Club sponsored by Karen Haynes and Justin Walley just took another step forward in their fishing/manufacturing club. They now have lures in ACE hardware of Chattanooga. Brainerd ACE is the first location with more locations to come.

Ms. Haynes and the students in the club applied for a small business – entrepreneurs grant last year and received \$1000 for their club and Business called Harrison Bay Lures. The students use the money to purchase materials to 3D print molds, they also bought molds, they purchased packaging materials, and of course the goop that is used to create the lures.

This \$1000 scholarship aims to encourage thoughtful entrepreneurship and get young people thinking about how to create a realistic business plan that could become a major project for them to realize.

Dustin Brown, Landon Hanke, Dylan Brown & Ms. Haynes
