

Feature Club of the Month: Skills U.S.A.

Montana Rogers, Reporter

SkillsUSA®

Introduction

The **SkillsUSA** program is designed for students who are interested in a skill that most classes or colleges don't cover, skills that were once only passed down are now taught in this program. These skills consist of, but not limited to; Action skills, Principles of Engineering, Future-ready programs, Plumbing, Drones, design engineering, and many more. In this program, students learn, build/perform, and compete for their certain skills team. Students interact with other students from other schools and states in head-to-head competitions for those student's certain skills.

What makes this club unique?

One thing that makes our school's club unique is the teacher Mr. Bright. He is fun-loving, laidback, and very respected by the students he teaches, along with the rest of the school's faculty, staff, and other students that do not have his class. Another reason the club is unique is that all the students, even with different skills, are connected and help one another when help is needed. Every club member has a different role.

The Students

The Students in the **Harrison Bay Future-ready Center club of SkillsUSA** both enjoy their club and also are engaging and energetic about the SkillsUSA club that HBFRC offers. Here are a few quotes from some club members;

-Alexis Roth; "I like how everybody pitches in, and that the competitions are fun."

-Gabriella Gray; "My favorite part is working with the people here as a whole. I also love the competitions that make everyone feel included."

-Taylor Doty; "My favorite part of the club is the team effort that is put in, into every competition, every project, and every day."
